# THE **IMPACT** OF HOME FLIGHT SIMULATION ON REAL-WORLD AVIATION TRAINING

A study of 1,000+ certificated pilots and air traffic controllers.

Our 2023 study found that home flight simulation has a *measurable benefit* on real-world aviation training.

5.5

The average number of **hours a pilot saves** in flight training by using home flight simulation.

89%

The percentage of **respondents who agreed** flight simulation is beneficial for flight training.

$1000+

The **amount a pilot could save** in flight training cost by using home flight simulation.

Assuming $200/hour in flight training costs.

Out of 14 FAA air traffic controllers with previous experience in Online Air Traffic Control...

100%

Checked out successfully at their first facility.

80%

Graduated from the FAA Academy *first in their class.*

13

Applied to the FAA because their flight simulation experience led them to *discover a potential career* in air traffic control.

FLIGHT SIMULATION ASSOCIATION

FS EXPO

A community of flight simmers, pilots, and developers that works to *promote flight simulation as a hobby and real-world training aid.*
